The Usage of Geometry and Measurement Data of the Single Stage Transonic Compressor with Optimized Stator of the Institute of Gas Turbines and Aerospace Propulsion (GLR) at the Technical University of Darmstadt (TUDa)

1. Scope of the cooperation

The aim is to share data of the GLR single stage transonic compressor (TUDa-GLR-OpenStage configuration with rotor 1 and an optimized stator) with a selected group within the turbomachinery community to improve component design, improve numerical tools, and increase the understanding of flow physics involved. Experiments and gathering of data has been and will be carried out by the GLR, exclusively.

2. Confidentiality agreement

The data provided by the GLR remains the property of GLR. They are intended to be used by the signing party and must not be further distributed to a third party without permission of the GLR.
